Education

VIT Bhopal University — Bhopal, Madhya Pradesh
B.Tech in Computer Science and Engineering (Gaming Technology), CGPA: 8.72/10 — Sep 2022 – Oct 2026

Technical Skills

Game Development: Unity, C#, C++, Object-Oriented Programming (OOP), Data Structures and Algorithm (DSA)
Tools & Technologies: Git, GitHub, Version Control, WebGL, AR/VR/XR, FL Studio
Game Design: Procedural Generation, Physics Simulation, Singleton Pattern, Object Pooling, Modular Architecture
Soft Skills: Team Leadership, Communication, Collaboration, Code Review, Agile Methodology

Work Experience

IITianCraft | Game Developer Intern and Team Lead, Remote — **Jul 2025 – Aug 2025**
- Directed a team of 7 game developers as project supervisor, delegated tasks and timelines, executed code reviews, and ensured on-time deliverables through weekly progress meetings.
- Programmed an RMG featuring core gameplay mechanics and payment gateway API integration for secure transactions.

IDZ Digital Private Limited | Unity Game Developer Intern, Remote — **Jan 2025 – Apr 2025**
- Prototyped 10+ games across 2D, 3D, AR/VR/XR platforms using Unity and C#, applying object-oriented principles and optimized game loops for real-time performance.
- Coordinated with 4 designers to refine gameplay mechanics, incorporated design feedback, and implemented innovative game concepts with rapid iteration.

Absurd Software | Music/SFX Artist Intern, Remote — **Oct 2024 – Feb 2025**
- Composed 50+ sound effects and background music tracks for *House of Heists*, achieving a top-10 ranking at IGDC 2024.
- Executed iterative playtesting sessions, provided 12 feedback reports, and optimized feedback loops to enhance user experience.

Projects

Helix Jump Proto | 3D Arcade, WebGL/Mobile | Game Developer — **Oct 2025**
https://eroxion.github.io/AnusheelSoni-Assignment-Helix_ Jump_ Proto/
- Programmed a procedurally generated PvE arcade game in Unity 6 with C#, featuring a vertical helix tower with randomized platform gaps, physics-based ball mechanics, and touch/mouse and keyboard input controls.
- Developed modular architecture with singleton pattern, object pooling for optimization, collision detection, scoring logic, and persistent high score storage using PlayerPrefs.
- Released a mobile-responsive WebGL build with version control via Git and GitHub, demonstrating proficiency in Unity's physics engine and procedural generation algorithms.

Tic Tac Toe 2D | 2D Strategy, WebGL/Mobile | Game Developer — **Jun 2025**
https://strange-erox.itch.io/tic-tac-toe
- Developed a PvP and PvE strategy game in Unity 6 with C#, implementing Minimax algorithm for AI opponent with optimal decision-making logic.
- Designed responsive UI using Unity UI Toolkit and TextMeshPro, incorporated audio feedback systems, and applied event-driven programming for seamless interactions.
- Leveraged Scriptable Objects for modular data management and followed SOLID principles to ensure code reusability and scalable architecture.

Brahm | 3D Narrative Puzzle, PC | Game Developer — **Apr 2024 – Jun 2024**
https://strange-erox.itch.io/brahm
- Created a narrative-driven PvE game promoting Indian culture in Unity, partnered with a 4-member team, and produced 8 puzzle levels with audio-visual integration.
- Designed modular C# game logic, engineered interactive systems using Unity's event system, and configured particle effects with sound triggers.

Extracurriculars

Virtual Reality and Gaming Club | Core Member, VIT Bhopal University — **Sep 2024 – Jul 2025**
- Conducted 2 game jams with 150+ participants and mentored participants on game development best practices.

Smart India Hackathon 2024 | Qualified in Internal Round, VIT Bhopal University — **Sep 2024**
- Coordinated with a 6-member team to design a technical solution addressing a problem statement with 500+ submissions.

IEEE Student Chapter | Core Member, VIT Bhopal University — **May 2024 – Jan 2025**
- Directed 2 coding events with 250 participants, streamlined Git workflows, and facilitated version control for 60 projects.

Bug Bonanza | First Place, GeeksforGeeks, VIT Bhopal — **Dec 2023**
- Solved 4 data structure and algorithm challenges, demonstrating technical proficiency and analytical reasoning skills.

Additional

Certifications: Unity and C# Basics (Meta Coursera), Python Essential Training (LinkedIn Learning)
Hobbies: Football, Music Production
Interests: Technology, Game Design, Interactive Media
Languages: Hindi, English
