Anusheel Soni

anusheelsoni4@gmail.com eroxion anusheel-soni leetcode.com/u/eroxion eroxion.github.io/portfolio

Summary

Unity/C# Game Developer with hands-on experience across indie studios and AAA game production. Skilled in gameplay programming, gameplay systems, game mechanics, rapid prototyping (2D/3D/AR/VR), and performance optimization. Experienced collaborating with multidisciplinary teams and applying player feedback, analytics, and agile development to build engaging gameplay experiences.

Education

VIT Bhopal University Bhopal, Madhya Pradesh
B.Tech in Computer Science and Engineering (Gaming Technology), CGPA: 8.70/10 Sep 2022 – Oct 2026

Technical Skills

Languages: C#, C++
Engines & Platforms: Unity, WebGL, AR/VR/XR
Systems & Patterns: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Procedural Generation, Physics Simulation, Singleton Pattern, Object Pooling, Modular Architecture, Gameplay Systems, Game Mechanics
Design & UX: Game Design, Level Design, User Experience (UX), User Interface (UI)
Tools: Git, GitHub, JetBrains Rider, FL Studio, Jira, Jenkins, Confluence
Soft Skills: Team Leadership, Communication, Collaboration, Code Review, Agile Methodology

Work Experience

Electronic Arts (EA) | Quality Analyst Intern, Hyderabad **Jan 2026 – Jun 2026**

- Ensured quality of the live-service mobile game *The Sims FreePlay* through gameplay testing, feature validation, defect reporting, and close collaboration with designers, developers, artists, and producers.
- Owned validation of major features including *Mystery Box V2* and *Build Mode 2.0*, while contributing gameplay feedback during playtests for EA titles such as *EA SPORTS FC Mobile* and *Star Wars: Galaxy of Heroes*.
- Introduced AI-driven workflow improvements for documentation, recurring QA tasks, and test creation, improving team efficiency while being recognized by leadership for initiative, rapid learning, ownership, and cross-functional collaboration.

EternoPlay Studio | Game Developer Intern, Remote **Oct 2025 – Dec 2025**

- Contributed to *HexaBattle* with gameplay programming in Unity and C#, implementing features, and shipping iterative updates aligned with game design.
- Optimized performance for mobile builds, refined UI/UX flows, and improved player experience using user feedback, store reviews, and KPI analysis (retention, session length, level completion), contributing to a 30–40% increase in DAU.

IDZ Digital Private Limited | Unity Game Developer Intern, Remote **Jan 2025 – Apr 2025**

- Developed 10+ Unity prototypes across 2D, 3D, AR, and VR, implementing gameplay systems, object-oriented architecture, and performance optimization while delivering 3–4 prototypes per month.
- Coordinated with 4 designers to refine gameplay mechanics, incorporated design feedback, and implemented innovative game concepts with rapid iteration.

Projects

Helix Jump Proto | 3D Arcade, WebGL/Mobile | Game Developer **Oct 2025**
https://eroxion.github.io/Helix_Jump_Proto/

- Programmed a procedurally generated PvE arcade game in Unity 6 with C#, featuring a vertical helix tower with randomized platform gaps, physics-based ball mechanics, and 4 difficulty-based levels with touch/mouse and keyboard input controls.
- Developed modular architecture with singleton pattern, object pooling for optimization, collision detection, scoring logic, and persistent high score storage using PlayerPrefs.
- Released a mobile-responsive WebGL build with version control via Git and GitHub, demonstrating proficiency in Unity's physics engine and procedural generation algorithms.

Tic Tac Toe 2D | 2D Strategy, WebGL/Mobile | Game Developer **Jun 2025**
https://strange-erox.itch.io/tic-tac-toe

- Implemented gameplay programming for a PvP and PvE strategy game in Unity 6 with C#, implementing Minimax algorithm for AI opponent with optimal decision-making logic.
- Designed responsive UI using Unity UI Toolkit and TextMeshPro, incorporated audio feedback systems, and applied event-driven programming for seamless interactions.
- Leveraged Scriptable Objects for modular data management and followed SOLID principles to ensure code reusability and scalable architecture.

Extracurriculars

Virtual Reality and Gaming Club | Core Member, VIT Bhopal University **Sep 2024 – Jul 2025**

- Conducted 2 game jams with 150–200 participants and mentored participants on game development best practices.

Additional

Certifications: Unity and C# Basics (Meta Coursera), Python Essential Training (LinkedIn Learning)
Hobbies: Football, Music Production
Interests: Technology, Game Design, Interactive Media
Languages: Hindi, English
